6. Objectives of the initiative: 5G deployment is putting our rights to a healthy environment, freedom and privacy at stake.
We call on the Commission to propose legislation to protect citizens and the environment from these threats:

1. Humans, fauna and flora are being harmed by radiation. Current exposure limits provide insufficient protection — especially for vulnerable people (like children, pregnant women, patients, the elderly), animals, pollinating insects and plants
— Enact regulation to protect all life from radio frequency and microwave radiation *

2. With 5G the amount of connected electronic devices, antennas and satellites will explode. Unsustainable energy consumption, radiation emissions, harmful mining and pollution will follow, which will endanger biodiversity and natural habitats
— Enact stronger regulation to protect the environment from all the impacts of 5G and digitalization*

3. 5G enables massive data collection and surveillance by connected objects. This will increase the risk of cybercrime, data leak, theft, resale and misuse of artificial intelligence
— Enact effective data protection to safeguard our privacy, security and freedom *
