

# 7 countries of the EU launch a European Citizens' Initiative (ECI)

All 27 EU Member States may participate in the collection of signatures and at least 7 of them have to reach a certain required number of signatures – a quorum.

[https://europa.eu/citizens-initiative/thresholds\\_en](https://europa.eu/citizens-initiative/thresholds_en)

1 million signatures from 27 EU countries must be collected within twelve months (online and analog possible).

Start: March 1, 2022

**Demands of the European Citizens Initiative *Stop ((5G)) - Stay Connected but Protected***

**HEALTH**  
Enact regulation to protect all life from radio frequency and microwave radiation.

Reason: Dangerous to all life, humans, flora and fauna are harmed by radiation.

10 proposals

**ENVIRONMENT**  
Enact stronger regulation to protect the environment from all the impacts of 5G and digitalization.

Reason: Destruction of our environment. With 5G, the need for resources (minerals, energy) will increase enormously.

8 proposals

**PRIVACY**  
Enact effective data protection to safeguard our privacy, security and freedom.

Reason: Threat to our privacy  
5G enables massive data collection and surveillance by networked objects.

5 proposals

The ECI with 23 proposals for changes in EU regulations was submitted to the EU Commission, find the proposals on our website [signstop5g.eu](http://signstop5g.eu)

The 1 million signatures will force the European Commission to deal with our 23 proposals.
